

# Aramid Mechanical Packing

AP STYLE 750

**CURTISS -  
WRIGHT**

## AP Style 750

Style 750 is a unique packing, combining the best of two products, AP Style 725 and AP Style 747. It has aramid corners that prevent roll and extrusion while the graphite-encapsulated PTFE center provides sealing and lubricating qualities for your toughest applications. Style 750 is an excellent general service packing for severe pump applications.

Style 750 is designed for corrosive and abrasive fluids in slurries, mixers, and centrifugal and reciprocating pumps. It is widely used in power generation, paper mills, and waste treatment facilities. Style 750 is available as individual rings, combination sets, and in bulk.

## Typical Properties

Maximum Temperature
550 °F
Maximum Pressure
300 psi
Maximum Shaft Speed
2,500 FPM
pH Range
2 - 11
Construction
Lattice Braid
