

Power & Process Products and Services

## About Curtiss-Wright

Curtiss-Wright is a leading supplier of fluid sealing technologies and services for valve and pump repair shops; the refinery, petrochemical, chemical, nuclear, and fossil power generation industries; and DOE and DOD markets. We are recognized as an industry leader in providing fluid leak solutions with unmatched customer service and quality.

## Commercial Valve and Actuator Solutions

Curtiss-Wright has access to over \$100M in commercial valves and actuators for the chemical, oilfield, petrochemical, pulp & paper, refining, power, and water treatment industries. Our staff can help source replacement like-for-like valves and actuators or work with your staff to procure hard-to-find items, such as exotic alloy valves, to meet unique applications. With access to this readily available and comprehensive valve and actuator inventory, Curtiss-Wright is able to quickly ship most items, and even offers same-day shipment on certain products.

## Product Offerings

- Valve sizes from 1/4" to 64"
- Pressure Class 150# - 6000#
- Butt welded, flanged, pressure seal, and ring joint flanges options
- Exotic materials available
- All methods of actuation, including pneumatic, electro-hydraulic, and others
- Standard, low, and high temperature trim sets
- Gate, globe, ball, butterfly, check, and many other valve types
