Safety Data Sheet

[WHMIS Symbols]			
[VVHIVIIS SYMDOIS]			
N/A			
[Potential Health Hazard]			
[1 Oteniai Floatii Flazara]			
Eye – Eye contact may ca	ause slight	chemical and mechanical irritation.	
Skin - Dermal irritation an	nd allergic s	kin reaction if dust contacts skin for p	rolonged or repeated periods. May
cause abrasion with resu	Iting irritation	on and rash.	
Inhalation - Release of la	rge amoun	ts of dust may cause upper respirator	y tract irritation and dust related lung
disease (fibrosis).			
Ingestion – Low toxicity if	ingested.		
Section 4 – First Aid M	Measures		
Skin Contact:			
Frequent washing will det	ter transito	ry chemical and mechanical dermatitis	s. If rash develops consult a physician.
Eye Contact:			
Immediately wash eyes v	vith water fo	or at least 5 minutes. Seek medical at	tention is discomfort persists.
Inhalation:			
Remove patient to fresh a	air. Seek me	edical attention.	
Ingestion:			
Induce vomiting and seek medical attention.			
Section 5 – Fire Fighti	., _ .	1	
Flammable:	ii yes, under v	vhat conditions?	
⊠ Yes □ No			
Means of Extinction:			
Use water, DRY chemical	l, carbon di	oxide, foam, or water spray. Use adec	quate personal protective equipment.
Flashpoint (°C) and Method:		Upper Flammable Limit (% by Volume):	Lower Flammable Limit (% by Volume):
Does not Flash		No data	No data
Auto ignition Temperature (°C):		Explosion Data – Sensitivity to impact:	Explosion Data – Sensitivity to Static Discharge:

Safety Data Sheet Middleburg Hts., OH

N/A	N/A	N/A		
Hazardous Combustion Products:		<u> </u>		
None				
[NFPA]:				
N/A				
Section 6 – Accidental Releas	e Measures			
Leak and Spill Procedures:				
As sheet Gasketing, product does vacuum fitted with a HEPA filter or		ccumulated dust m	ay be vacuumed usin	g a
Section 7 – Handling and Stor	age			
Handling Procedures and Equipment:				
In normal handling of sheet and ga	skets, no significant release of	dust occurs.		
Storage Requirements:				
While there are no hazards associa	ated with storage we recommen	nd the following sto	orage conditions.	
Storage temperature below 75°F				
Humidity between 50% - 60%				
Darkened storage room				
If these conditions are met, a useful	ul life of 5 years can be expecte	ed.		
Section 8 – Exposure Control	s/Personal Protection			
Exposure limits:		EL [Other (specify)	
Specific Engineering Controls (such as ventilation	n, enclosure process)			
Ventilation needed only for dust-pro	oducing activities. Local exhau	st may be necessa	ry for some application	ons.
Personal Protective Equipment 🗵 Gloves	s ⊠ Respirator ⊠ Eye [☐ Footwear ☐ cl	othing 🛛 other	
If marked, please specify type:				
Skin protection - For brief contact, When prolonged or frequent repea	•	•		

Physical State:

Middleburg Hts., OH

Odor Threshold:

Safety Data Sheet

rubber to prevent skin irritation and dermatitis.

Section 9 – Physical and Chemical Properties

Respiratory Protection - Respiratory protection is not required under normal processing of sheet gaskets. Respiratory protection is required when dust-emitting activates (grinding, pile driving, sanding, etc.) are performed. Use only NIOSH/MSHA approved air-purifying respirators or positive pressure, self-contained breathing apparatus when exposure guidelines are greatly exceeded. In confined or poorly ventilated areas, use approved SCBA device.

Eye Protection – Safety glasses are recommended when dust-emitting activates occur.

Odor and Appearance:

Solid	Slight odor Tan in color Not relevant

Embryo toxicity:	Mutagenicity:
No data available	No data available
Name of Synergistic Products / Effects:	
No data available	
[Optional, not require	d under WHMIS1

Section 12 - Ecological Information

Aquatic Toxicity:

No data available

Section 13 – Disposal Considerations

Waste Disposal:

Sheet gasket materials are not hazardous waste as defined under RCRA. However, since waste disposal laws vary within states and municipalities, disposal of these products should be in accordance with all local, state,

Safety Data Sheet

and federal laws and regulations (contact local or state environmental agencies for spe	cific rules).
Section 14 – Transport Inform	 nation	
Special Shipping Information:	141011	
No special precautions necessary.

Not regulated	Not regulated	
[SARA]	[TSCA]	
Not regulated	Not regulated	
This product has been classified in acc	cordance with the hazard criteria of the Controlled Products Regucontains all of the information required by CPR.	ulations (CPR) and MSDS

Section 16 – Other Information

Use: The limitations of use decrease significantly as gasket thickness increases. Do not use a thicker gasket material or "double gaskets" to solve a gasket problem without first consulting the manufacturer. Curtiss-Wright engineers can advise on gasket selection and installation based on specified operating conditions. If you are in any doubt, visit our website at www.cwnuclear.com, fax us at 724-295-6201 or phone us at +1.216.267.3200.

All gaskets should be cut by trained personnel only. Incorrect cutting can produce weaknesses in a gasket that may not be visible, but could cause failure. Gasket installation should be carried out by trained personnel only.

The ability of a gasket material to make and maintain a seal depends not only on the quality of the gasket material, but also on medium being sealed, the flange design, the amount of pressure applied to the gasket by

Safety Data Sheet

the bolts and how the gasket is assembled into the flanges and tightened.

The higher the operating pressure and/or temperature, the greater the care and expertise required in selecting and installing gaskets. This includes, but is not limited to: confirmation that the flanges are suitable for the intended use; the finish on the flange faces; the parallelism of the flange faces; confirmation that the studs, bolts, washers and nuts are suitable for the intended use and in good condition; no anti stick compound is applied to the flanges or gaskets; confirmation that the gasket material and thickness are suitable for the intended use; and the gasket is evenly loaded by the correct tightening sequence of the bolts or studs, and to the correct torque to give the required gasket assembly stress. The use of torque wrenches, hydraulic bolt tensioners or other loading devices can assist achievement of the correct gasket stress.

The application of release agents to the gasket or flanges may cause gasket failure.

Because conditions of use are beyond the manufacturer's control, it is the responsibility of the user to ensure that the product is suitable for the intended use.

WARNING: Catastrophic gasket failure can be caused by steam or water hammer. Steam or water hammer can cause an instantaneous increase in internal pressure on the assembly that far exceeds the design or test pressures. Where water hammer exists, the basic problem should be corrected. DO NOT USE AP MATERIAL IN APPLICATIONS WHERE WATER OR STEAM HAMMER MAY STRESS THE GASKET BEYOND ITS DESIGN TOLERANCES

The information above is believed to be accurate and represents the best information available to us. However, we make no warranty expressed or implied, with respect to such information, and we assume no liability resulting from its use.
