Route of Entry: Skin Absorption/contact Eye Contact	nct 🛛 Inhalation 🖾 Ingestion	n	
[Emergency Overview]			

Contains fibers and particulates. Avoid Creating dust. Breathing Gasket dust may cause permanent lung

Safety Data Sheet

damage.					
[WHMIS Symbols]					
W/A					
[Potential Health Hazard]					
Eye – Eye contact may ca	ause slight	chemical and mechanical irritation.			
Skin - Dermal irritation ar cause abrasion with resu	•	kin reaction if dust contacts skin for pon and rash.	rolonged or repeated periods. May		
Inhalation - Release of la disease (fibrosis).	rge amoun	ts of dust may cause upper respirator	y tract irritation and dust related lung		
Ingestion – Low toxicity if	f ingested.				
Section 4 – First Aid I	Measures				
Skin Contact:					
Frequent washing will de	ter transito	ry chemical and mechanical dermatitis	s. If rash develops consult a physician.		
Eye Contact:					
Immediately wash eyes	with water f	or at least 5 minutes. Seek medical at	tention is discomfort persists.		
Inhalation:					
Remove patient to fresh a	air. Seek m	edical attention.			
Ingestion:					
Induce vomiting and seek	medical at	tention.			
Castion E. Fine Fight	ing Mass				
Section 5 – Fire Fight Flammable:		vhat conditions?			
⊠ Yes □ No					
Means of Extinction:					
Use water, DRY chemica	l, carbon di	oxide, foam, or water spray. Use ade	quate personal protective equipment.		
Flashpoint (°C) and Method:		Upper Flammable Limit (% by Volume):	Lower Flammable Limit (% by Volume):		
Does not Flash		No data	No data

·				∩ I ⁻ LL	□ Other	(ap c olly)	
Specific Engineering Controls (such	as ventilation, e	enclosure process)					
Ventilation needed only for	r dust-produ	ucing activities	. Local exh	aust may be	necessary for	some applica	ations.
Personal Protective Equipment	⊠ Gloves	⊠ Respirator	⊠ Eye	☐ Footwear	⊠ clothing	☐ other	
If marked, please specify type:							
Skin protection - For brief	contact, no	precautions o	ther than c	ean body-co	overing clothing	should be r	needed

Physical State:

Solid

Middleburg Hts., OH

Odor Threshold:

Not relevant

Safety Data Sheet

When prolonged or frequent repeated contact could occur, use protective clothing and gloves such as butyl rubber to prevent skin irritation and dermatitis.

Respiratory Protection - Respiratory protection is not required under normal processing of sheet gaskets. Respiratory protection is required when dust-emitting activates (grinding, pile driving, sanding, etc.) are performed. Use only NIOSH/MSHA approved air-purifying respirators or positive pressure, self-contained breathing apparatus when exposure guidelines are greatly exceeded. In confined or poorly ventilated areas, use approved SCBA device.

Eye Protection – Safety glasses are recommended when dust-emitting activates occur.

Odor and Appearance:

Slight odor red in color

Section 9 – Physical and Chemical Properties

Section 12 – Ecological Information

Aquatic Toxicity:

No data available

Section 13 – Disposal Considerations

Waste Disposal:

Sheet gasket materials are *not* hazardous waste as defined under RCRA. However, since waste disposal laws vary within states and municipalities, disposal of these products should be in accordance with all local, state,

Safety Data Sheet

and federal laws and regulations (contact local or state environmental agencies for specific rules).

Section 14 – Transport Information					
Special Shipping Information:		·			
No special precautions necessary.					
		PIN			
		N/A

Section 15 – Regulatory Information					
[WHMIS Classification]	[OSHA]				
Not regulated	Not regulated				
[SERA]	[TSCA]				
Not regulated	Not regulated				
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and MSDS contains all of the information required by CPR.					

Section 16 - Other Information

Use: The limitations of use decrease significantly as gasket thickness increases. Do not use a thicker gasket material or "double gaskets" to solve a gasket problem without first consulting the manufacturer. Curtiss-Wright engineers can advise on gasket selection and installation based on specified operating conditions. If you are in any doubt, visit our website at www.cwnuclear.com, fax us at 724-295-6201 or phone us at +1.216.267.3200.

All gaskets should be cut by trained personnel only. Incorrect cutting can produce weaknesses in a gasket that may not be visible, but could cause failure. Gasket installation should be carried out by trained personnel only.

The ability of a gasket material to make and maintain a seal depends not only on the quality of the gasket material, but also on medium being sealed, the flange design, the amount of pressure applied to the gasket by the bolts and how the gasket is assembled into the flanges and tightened.

Safety Data Sheet

The higher the operating pressure and/or temperature, the greater the care and expertise required in selecting and installing gaskets. This includes, but is not limited to: confirmation that the flanges are suitable for the intended use; the finish on the flange faces; the parallelism of the flange faces; confirmation that the studs, bolts, washers and nuts are suitable for the intended use and in good condition; no anti stick compound is applied to the flanges or gaskets; confirmation that the gasket material and thickness are suitable for the intended use; and the gasket is evenly loaded by the correct tightening sequence of the bolts or studs, and to the correct torque to give the required gasket assembly stress. The use of torque wrenches, hydraulic bolt tensioners or other loading devices can assist achievement of the correct gasket stress.

The application of release agents to the gasket or flanges may cause gasket failure.

Because conditions of use are beyond the manufacturer's control, it is the responsibility of the user to ensure that the product is suitable for the intended use.

WARNING: Catastrophic gasket failure can be caused by steam or water hammer. Steam or water hammer can cause an instantaneous increase in internal pressure on the assembly that far exceeds the design or test pressures. Where water hammer exists, the basic problem should be corrected. DO NOT USE AP MATERIAL IN APPLICATIONS WHERE WATER OR STEAM HAMMER MAY STRESS THE GASKET BEYOND ITS DESIGN TOLERANCES

The information above is believed to be accurate and represents the best information available to us. However, we make no warranty expressed or implied, with respect to such information, and we assume no liability resulting from its use.
