Route of Entry: Skin Absor	ption 🗵	Eye Contact	⊠ Inh	alation	⊠ Ing	gestion		
[Emergency Overview]								
Release of large amounts o	f dust may o	cause upper	respiratory	/ tract	irritation a	nd dust-relate	ed lung disease	.
Dermal irritation and allergic	•							
Contains fibers and particular					•			
damage.		-		-				

Safety Data Sheet

[WHMIS Symbols]		-	
N/A			
[Potential Health Hazard]			
Eye – Eye contact may ca	ause slight	chemical and mechanical irritation	n.
Skin - Dermal irritation ar cause abrasion with resu			for prolonged or repeated periods. May
Inhalation - Release of la disease (fibrosis).	irge amoun	ts of dust may cause upper respir	ratory tract irritation and dust related lung
Ingestion – Low toxicity if	f ingested.		
Section 4 – First Aid I	Measures		
Skin Contact: Frequent washing will de	ter transito	ry chemical and mechanical derm	atitis. If rash develops consult a physician.
Eye Contact:			
Immediately wash eyes v	with water f	or at least 5 minutes. Seek medic	al attention is discomfort persists.
Inhalation:			
Remove patient to fresh a	air. Seek m	edical attention.	
Ingestion:			
Induce vomiting and seek	medical at	tention.	
Section 5 – Fire Fight	ing Measi	ires	
Flammable:	If yes, under what conditions?		
⊠ Yes □ No	Extreme Heat And Flame		
Means of Extinction:			
Use water, DRY chemica	l, carbon di	oxide, foam, or water spray. Use	adequate personal protective equipment.
Flashpoint (°C) and Method:		Upper Flammable Limit (% by Volume):	Lower Flammable Limit (% by Volume):
Does not Flash No data No data			No data
Auto ignition Temperature (°C): Explosion Data – Sensitivity to impact: Explosion Data – Sensitivity to Static Disch			Explosion Data – Sensitivity to Static Discharge:

Safety Data Sheet

	Galoty Ba	ia Onoot	
No data	No data		No data
Hazardous Combustion Products:			
Carbon monoxide and Carbon	dioxide		
[NFPA]:			
N/A			
Section 6 – Accidental Re	lease Measures		
Leak and Spill Procedures:			
	•		ed dust may be vacuumed using a
vacuum fitted with a HEPA fil	er or wet mopped for clean	iup.	
Coation 7 Handling and	Storage		
Section 7 – Handling and Handling Procedures and Equipment:	Storage		
In normal handling of sheet a	nd gaskets, no significant re	elease of dust occ	curs.
Storage Requirements:			
While there are no hazards as	sociated with storage we re	ecommend the fol	lowing storage conditions.
Storage temperature below 7	5°F		
Humidity between 50% - 60%			
Darkened storage room			
If these conditions are met, a	useful life of 5 years can be	e expected.	_
Section 8 – Exposure Co			
Exposure limits:	GIH TLV OSHA PE	EL □ Ot	ther (specify)
Specific Engineering Controls (such as ve	entilation, enclosure process)		
Ventilation needed only for du	st-producing activities. Loc	al exhaust may be	e necessary for some applications.
Personal Protective Equipment	Gloves 🗵 Respirator 🗵	Eye	r ⊠ clothing □ other
If marked, please specify type:			
•	· · · · · · · · · · · · · · · · · · ·	•	overing clothing should be needed.
When prolonged or frequent i	epeated contact could occu	ur, use protective	clothing and gloves such as butyl

Safety Data Sheet

rubber to prevent skin irritation and dermatitis.

Respiratory Protection - Respiratory protection is not required under normal processing of sheet gaskets. Respiratory protection is required when dust-emitting activates (grinding, pile driving, sanding, etc.) are performed. Use only NIOSH/MSHA approved air-purifying respirators or positive pressure, self-contained breathing apparatus when exposure guidelines are greatly exceeded. In confined or poorly ventilated areas, use approved SCBA device.

Eye Protection – Safety glasses are recommended when dust-emitting activates occur.

Section 9 - Physical and	d Chemical Properties			
Physical State:	Odor and Appearance:	Odor Threshold:		
Solid	Slight Odor Black in Color	Not Relevant		
Specific Gravity:	Vapor Density (air =1):	Vapor Pressure (mmHg):		
1.1 – 1.4	N/A	N/A		
Evaporation rate:	Boiling Point (°C):	Freezing Point (°C):		
N/A	N/A	N/A		
pH:	Coefficient of Water / Oil Distribution:	[Solubility in Water]:		
N/A	N/A	Insoluble		
Section 10 – Stability ar	nd Reactivity			
Chemical Stability	If no, under which conditions?			
⊠ Yes □ No				
Incompatibility With Other Substances	If yes, which ones?			
⊠ Yes □ No	Strong oxidizers, strong Acids and bases			
(Conditions to avoid) Avoid	open flame, welding arcs, or high tempe	erature sources which induce thermal		
decomposition.				
Reactivity and under what conditions:				
(Specific materials to avoid) cause premature product de		nd bases. Exposure to these chemicals may		

Safety Data Sheet

Hazardous Decomposition Product:

Hydrogen Chloride, Hydrogencyanide, Aliphatics, other possible

Section 11 – Toxicological Information	
Effects of Acute Exposure:	I
Inhalation or ingestion of finely divided powder or dust may	y be harmful.
Effects of Chronic Exposure:	
Contains fibers and particulates. Avoid Creating dust. Breadamage.	thing Gasket dust may cause permanent lung
Irritancy of Product:

Skin Sensitization:	Respiratory Sensitization:
Relative	Relative
Carcinogenicity – IARC:	Carcinogenicity – ACGIH:
Not listed as Carcinogenic	Not listed as Carcinogenic
Reproductive Toxicity:	Teratogenicity:
No data available	No data available
Embryo toxicity:	Mutagenicity:
No data available	No data available

Name of Synergistic Products / Effects:

No data available

[Optional, not required under WHMIS]

Section 12 - Ecological Information

Aquatic Toxicity:

No data available

Section 13 – Disposal Considerations

Waste Disposal:

Sheet gasket materials are not hazardous waste as defined under RCRA. However, since waste disposal laws

Safety Data Sheet

vary within states and municipalities, disposal of these products should be in accordance with all local, state, and federal laws and regulations (contact local or state environmental agencies for specific rules).

Section 14 – Transport Inform	tion
Special Shipping Information:	
No special precautions necessary.	
	PIN
	N/A
TDG:	[DOT]
N/A	Not regulated
[IMO]	[ICAO]
N/A	N/A
Section 15 – Regulatory Inform	ation
[WHMIS Classification]	[OSHA]
Not regulated	Not regulated
[SERA]	[TSCA]
Not regulated	Not regulated
This product has been classified in accordance	dance with the hazard criteria of the Controlled Products Regulations (CPR) and MSDS contains all of the information required by CPR.

Section 16 – Other Information

Use: The limitations of use decrease significantly as gasket thickness increases. Do not use a thicker gasket material or "double gaskets" to solve a gasket problem without first consulting the manufacturer. Curtiss-Wright engineers can advise on gasket selection and installation based on specified operating conditions. If you are in any doubt, visit our website at www.cwnuclear.com, fax us at 724-295-6201 or phone us at +1.216.267.3200.

All gaskets should be cut by trained personnel only. Incorrect cutting can produce weaknesses in a gasket that may not be visible, but could cause failure. Gasket installation should be carried out by trained personnel only.

The ability of a gasket material to make and maintain a seal depends not only on the quality of the gasket material, but also on medium being sealed, the flange design, the amount of pressure applied to the gasket by the bolts and how the gasket is assembled into the flanges and tightened.

Safety Data Sheet

The higher the operating pressure and/or temperature, the greater the care and expertise required in selecting and installing gaskets. This includes, but is not limited to: confirmation that the flanges are suitable for the intended use; the finish on the flange faces; the parallelism of the flange faces; confirmation that the studs, bolts, washers and nuts are suitable for the intended use and in good condition; no anti stick compound is applied to the flanges or gaskets; confirmation that the gasket material and thickness are suitable for the intended use; and the gasket is evenly loaded by the correct tightening sequence of the bolts or studs, and to the correct torque to give the required gasket assembly stress. The use of torque wrenches, hydraulic bolt tensioners or other loading devices can assist achievement of the correct gasket stress.

The application of release agents to the gasket or flanges may cause gasket failure.

Because conditions of use are beyond the manufacturer's control, it is the responsibility of the user to ensure that the product is suitable for the intended use.

WARNING: Catastrophic gasket failure can be caused by steam or water hammer. Steam or water hammer can cause an instantaneous increase in internal pressure on the assembly that far exceeds the design or test pressures. Where water hammer exists, the basic problem should be corrected. DO NOT USE AP MATERIAL IN APPLICATIONS WHERE WATER OR STEAM HAMMER MAY STRESS THE GASKET BEYOND ITS DESIGN TOLERANCES

The information above is believed to be accurate and represents the best information available to us. However, we make no warranty expressed or implied, with respect to such information, and we assume no liability resulting from its use.

[Optional, not required under WHMIS]
