N/A						

Middleburg Hts., OH

[Potential Health Hazard]

Eye – Eye contact may cause slight chemical and mechanical irritation.

Skin - Dermal irritation and allergic skin reaction if dust contacts skin for prolonged or repeated periods. May cause abrasion with resulting irritation and rash.

Inhalation - Release of large amounts of dust may cause upper respiratory tract irritation and dust related lung disease (fibrosis).

Ingestion – Low toxicity if ingested.

Section 4 – First Aid Measures

Skin Contact:

Frequent washing will deter transitory chemical and mechanical dermatitis. If rash develops consult a physician

Eye Contact:

Immediately wash eyes with water for at least 5 minutes. Seek medical attention is discomfort persists.

Inhalation:

Remove patient to fresh air. Seek medical attention.

Ingestion:

Induce vomiting and seek medical attention.

Flammable:	If yes, under what conditions?	ng Measures If yes, under what conditions?		
🛛 Yes 🗌 No	Heat Flame	Heat Flame		
Means of Extinction:				
Jse water, DRY chemi	ical, carbon dioxide, foam, or water spray	v. Use adequate personal protective equipment

Hazardous Combustion Produc	cts:			
		oves when handling residue from any fire		

[NFPA]:

N/A

Section 6 – Accidental Release Measures

Leak and Spill Procedures:

As sheet Gasketing, product does not spill or create a release. Accumulated dust may be vacuumed using a vacuum fitted with a HEPA filter or wet mopped for cleanup.

Section 7 – Handling and Storage

Handling Procedures and Equipment:

In normal handling of sheet and gaskets, no significant release of dust occurs.

Storage Requirements:

While there are no hazards associated with storage we recommend the following storage conditions.

Storage temperature below 75°F

Humidity between 50% - 60%

Darkened storage room

If these conditions are met, a useful life of 5 years can be expected.

Section 8 – Expos	ure Controls/Pe	rsonal Protectio	on		
Exposure limits:	ACGIH TLV		. 🗌 Othe	r (specify)	
Specific Engineering Controls			l exhaust may be n	ecessary for so	me applications.
Personal Protective Equipment			Eye Footwear		other
If marked, please specify typ	e:				
Skin protection - For When prolonged or fir rubber to prevent skin	equent repeated c	ontact could occu	· · · · · ·	•	
Respiratory Protection Respiratory protection performed. Use only breathing apparatus	n is required when NIOSH/MSHA app	dust-emitting acti roved air-purifying	vates (grinding, pile respirators or pos	e driving, sandir itive pressure, s	ng, etc.) are self-contained

use approved SCBA device.

Eye Protection – Safety glasses are recommended when dust-emitting activates occur.

Section 9 – Physical and Chemical Properties				
Physical State:	Odor and Appearance:	Odor Threshold:		
Solid	Slight cinnamon odor, Black in color	Not relevant		
Specific Gravity:	Vapor Density (air =1):	Vapor Pressure (mmHg):		
1.954	N/A	N/A		
Evaporation rate:	Boiling Point (°C):	Freezing Point (°C):		
N/A	N/A	N/A		
pH:	Coefficient of Water / Oil Distribution:	[Solubility in Water]:		
N/A	N/A	Insoluble		

Section 10 – Stability and Reactivity				
Chemical Stability	If no, under which conditions?			
🛛 Yes 🗌 No				
Incompatibility With Other Substances	If yes, which ones?			
☑ Yes □ No Strong oxidizers, strong Acids and bases				
(Conditions to avoid) Avoid open flame, welding arcs, or high temperature sources which induce thermal decomposition.				

Reactivity and under what conditions:

(Specific materials to avoid) Avoid strong oxidizers, strong Acids and bases. Exposure to these chemicals may cause premature product degeneration.

Hazardous Decomposition Product:

Carbon dioxide and carbon monoxide.

Section 11 – Toxicological Information

Effects of Acute Exposure

Inhalation or ingestion of finely divided powder or dust may be harmful.

Effects of Chronic Exposure:	
Contains fibers and particulates. Avoid Creating dust. Breat	thing Gasket dust may cause permanent lung
damage.	
Irritancy of Product:	
Relative	
Skin Sensitization:	Respiratory Sensitization:
Relative	Relative
Carcinogenicity – IARC:	Carcinogenicity – ACGIH:

Name of Synergistic Products / Effects:	
No data available	

[Optional, not required under WHMIS]

Section 12 – Ecological Information

Aquatic Toxicity:

No data available

Section 13 – Disposal Considerations

Waste Disposal:

Sheet gasket materials are not hazardous waste as defined under RCRA. However, since waste disposal laws vary within states and municipalities, disposal of these products should be in accordance with all local, state, and federal laws and regulations (contact local or state environmental agencies for specific rules).

Section 14 – Transport Information

Special Shipping Information:

No special precautions necessary.

Section 15 – Regulatory Information		
[WHMIS Classification]	[OSHA]	
Not regulated	Not regulated	
[SERA]	[TSCA]	
Not regulated	Not regulated	
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and MSDS		

contains all of the information required by CPR.

Section 16 – Other Information

Use: The limitations of use decrease significantly as gasket thickness increases. Do not use a thicker gasket material or "double gaskets" to solve a gasket problem without first consulting the manufacturer. Curtiss-Wright engineers can advise on gasket selection and installation based on specified operating conditions. If you are in any doubt, visit our website at <u>www.cwnuclear.com</u>, fax us at 724-295-6201 or phone us at +1.216.267.3200.

All gaskets should be cut by trained personnel only. Incorrect cutting can produce weaknesses in a gasket that may not be visible, but could cause failure. Gasket installation should be carried out by trained personnel only.

The ability of a gasket material to make and maintain a seal depends not only on the quality of the gasket material, but also on medium being sealed, the flange design, the amount of pressure applied to the gasket by the bolts and how the gasket is assembled into the flanges and tightened.

The higher the operating pressure and/or temperature, the greater the care and expertise required in selecting and installing gaskets. This includes, but is not limited to: confirmation that the flanges are suitable for the intended use; the finish on the flange faces; the parallelism of the flange faces; confirmation that the studs, bolts, washers and nuts are suitable for the intended use and in good condition; no anti stick compound is applied to the flanges or gaskets; confirmation that the gasket material and thickness are suitable for the intended use; and the gasket is evenly loaded by the correct tightening sequence of the bolts or studs, and to the correct torque to give the required gasket assembly stress. The use of torque wrenches, hydraulic bolt tensioners or other loading devices can assist achievement of the correct gasket stress.

The application of release agents to the gasket or flanges may cause gasket failure.

Because conditions of use are beyond the manufacturer's control, it is the responsibility of the user to ensure that the product is suitable for the intended use.

WARNING: Catastrophic gasket failure can be caused by steam or water hammer. Steam or water hammer can cause an instantaneous increase in internal pressure on the assembly that far exceeds the design or test pressures. Where water hammer exists, the basic problem should be corrected. DO NOT USE AP MATERIAL IN APPLICATIONS WHERE WATER OR STEAM HAMMER MAY STRESS THE GASKET BEYOND ITS DESIGN TOLERANCES

The information above is believed to be accurate and represents the best information available to us. However, we make no warranty expressed or implied, with respect to such information, and we assume no liability resulting from its use.
