AP STYLE 959/961

**CURTISS -  
WRIGHT**

## AP Style 959/961

Style 959 is manufactured from a combination of synthetic fibers blended together by a unique process. Twisted strands of this pliable fiber provide a general utility product with a wide variety of industrial applications.

Style 961 is a square braid version of Style 959 producing denser rope with less compression than twisted rope.

### Recommended Uses

For use on boiler doors, furnace doors, lids, and expansion joints.

## Typical Properties

<b>Maximum Temperature</b>
500 °F
<b>Standard Sizes</b>
1/4" through 2"
