[Potential Health Hazard]					
Eye – Eye contact may ca	ause slight	chemical and mechanical irritation.			
Skin - Dermal irritation ar	nd allergic s	kin reaction if dust contacts skin for p	rolonged or repeated periods. May		
cause abrasion with resu	Iting irritation	on and rash.			
Inhalation - Release of la	rge amoun	ts of dust may cause upper respirator	v tract irritation and dust related lung		
disease (fibrosis).	igo amoun	to or dust may sause appear respirator,	y tract initiation and dact related lang		
Ingestion – Low toxicity if	ingested.				
Continu 4 First Aid B	10				
Section 4 – First Aid N	weasures				
Frequent washing will de	ter transitoi	ry chemical and mechanical dermatitis	s. If rash develops consult a physician		
Eye Contact:					
Immediately wash eyes v	vith water f	or at least 5 minutes. Seek medical at	tention is discomfort persists.		
Inhalation:					
Remove patient to fresh a	air. Seek mo	edical attention			
•					
Ingestion:					
Induce vomiting and seek medical attention.

Section 6 – Accidental Relea	noo Mooouroo	
Leak and Spill Procedures:	ase weasures	
As sheet Gasketing, product doe	es not spill or create a release. Acc	cumulated dust may be vacuumed using a
vacuum fitted with a HEPA filter	•	difficulties dust may be vacuumed using a
Section 7 – Handling and St	orage	
Handling Procedures and Equipment:	<u> </u>	
In normal handling of sheet and	gaskets, no significant release of o	dust occurs.
Storage Requirements:		
While there are no hazards associ	ciated with storage we recommend	d the following storage conditions.
Storage temperature below 75° F	=	
Humidity between 50% - 60%		
Darkened storage room		
If these conditions are met, a use	eful life of 5 years can be expected	d.
Section 8 - Exposure Contro		
Exposure limits:	TLV ⊠ OSHA PEL	☐ Other (specify)
Specific Engineering Controls (such as ventila	ation, enclosure process)	
Ventilation needed only for dust-	producing activities. Local exhaust	may be necessary for some applications.
Personal Protective Equipment   G	cloves 🛛 Respirator 🖾 Eye	☐ Footwear ☐ clothing ☐ other
If marked, please specify type:		

## **Safety Data Sheet**

Skin protection - For brief contact, no precautions other than clean body-covering clothing should be needed. When prolonged or frequent repeated contact could occur, use protective clothing and gloves such as butyl rubber to prevent skin irritation and dermatitis.

Respiratory Protection - Respiratory protection is not required under normal processing of sheet gaskets. Respiratory protection is required when dust-emitting activates (grinding, pile driving, sanding, etc.) are performed. Use only NIOSH/MSHA approved air-purifying respirators or positive pressure, self-contained breathing apparatus when exposure guidelines are greatly exceeded. In confined or poorly ventilated areas, use approved SCBA device.

Eye Protection – Safety glasses are recommended when dust-emitting activates occur.

Section 12 – Ecological Information  Aquatic Toxicity:		

Section 13 - Disposal Considerations

No data available

## **Safety Data Sheet**

Waste Disposal:

Gasket materials are not hazardous waste as defined under RCRA. However, since waste disposal laws vary within states and municipalities, disposal of these products should be in accordance with all local, state, and federal laws and regulations (contact local or state environmental agencies for specific rules).

Section 14 – Transport Information:	ion
No special precautions necessary.

	lance with the hazard criteria of the Controlled Products Regulations (CPR) and MSDS ontains all of the information required by CPR.

#### Section 16 – Other Information

Use: The limitations of use decrease significantly as gasket thickness increases. Do not use a thicker gasket material or "double gaskets" to solve a gasket problem without first consulting the manufacturer. Curtiss-Wright engineers can advise on gasket selection and installation based on specified operating conditions. If you are in any doubt, visit our website at <a href="www.cwnuclear.com">www.cwnuclear.com</a>, fax us at 724-295-6201 or phone us at +1.216.267.3200.

All gaskets should be cut by trained personnel only. Incorrect cutting can produce weaknesses in a gasket that may not be visible, but could cause failure. Gasket installation should be carried out by trained personnel only.

The ability of a gasket material to make and maintain a seal depends not only on the quality of the gasket

## **Safety Data Sheet**

material, but also on medium being sealed, the flange design, the amount of pressure applied to the gasket by the bolts and how the gasket is assembled into the flanges and tightened.

The higher the operating pressure and/or temperature, the greater the care and expertise required in selecting and installing gaskets. This includes, but is not limited to: confirmation that the flanges are suitable for the intended use; the finish on the flange faces; the parallelism of the flange faces; confirmation that the studs, bolts, washers and nuts are suitable for the intended use and in good condition; no anti stick compound is applied to the flanges or gaskets; confirmation that the gasket material and thickness are suitable for the intended use; and the gasket is evenly loaded by the correct tightening sequence of the bolts or studs, and to the correct torque to give the required gasket assembly stress. The use of torque wrenches, hydraulic bolt tensioners or other loading devices can assist achievement of the correct gasket stress.

The application of release agents to the gasket or flanges may cause gasket failure.

Because conditions of use are beyond the manufacturer's control, it is the responsibility of the user to ensure that the product is suitable for the intended use.

WARNING: Catastrophic gasket failure can be caused by steam or water hammer. Steam or water hammer can cause an instantaneous increase in internal pressure on the assembly that far exceeds the design or test pressures. Where water hammer exists, the basic problem should be corrected. DO NOT USE AP MATERIAL IN APPLICATIONS WHERE WATER OR STEAM HAMMER MAY STRESS THE GASKET BEYOND ITS DESIGN TOLERANCES

The information above is believed to be accurate and represents the best information available to us. However, we make no warranty expressed or implied, with respect to such information, and we assume no liability resulting from its use.
