## The In-Processing and Access Authorization (IPAA) Mobile Check-In Application

Built around Curtiss-Wright's innovative and effective In-Processing and Access Authorization (IPAA) Suite, the IPAA Mobile Check-In App streamlines the outage check-in process. The app syncronizes effortlessly with IPAA's Security Screening Information Suite (SSIS) to give utilities full visibility on their in-processing information, while also simplifying the required paperwork for applicants. Using a mixture of fixed and dynamic content, the app offers a range of functions including:

- A Comprehensive List of Applicants
    - See all applicants arriving for the day
    - Search by applicant name or ID regardless of their arrival date
    - Tap any name to start or continue the check-in process
- Applicant Details
    - Review and update all applicant details, including photos
- Custom, Utility-Specific Forms
    - Develop and display any number of pages with utility configured text
    - Includes utility-specific documents, such as badging responsibilites or reporting requirements
- Electronic Signature
    - Collect applicant signitures digitally
    - Acknowledgement statement is utility-configurable
- ID Verification
    - Capture ID verification data, including when data is created and by whom
    - Snap photos of IDs and other supporting documentation for record keeping

The IPAA Mobile Check-In App streamlines and simplifies in-processing tasks.

The IPAA Mobile Check-In App's easy-to use interface makes completing paperwork more efficient.
