IPAA Fitness for Duty Mobile Application

Personnel Management Solutions

CURTISS -WRIGHT

The In-Processing and Access Authorization (IPAA) Fitness for Duty (FFD) Mobile Application

Utilizing Curtiss-Wright's innovative and effective IPAA Suite, the IPAA FFD Mobile Application seamlessly integrates with the Security Screening Information System (SSIS) to deliver a streamlined collection experience. The FFD Mobile application gives FFD Collectors a simple, easy to use interface that tracks both upcoming and in-process testing events.

The application supports the testing process from identification through collection by providing:

Features:

- Customizable instructions and consent forms
- Searchable, filterable queue of individuals who require collection
- Flexibility to collect samples in an efficient sequence
- Consumption and hydration tracking
- Ability to collect photographic scans of paperwork (e.g., BAC receipt, chain of custody form)
- Information readily available in SSIS
- Printable audit report

Sample Process:

- 1. Collector chooses donor from the list
- 2. Donor reads the instructions
- 3. Donor reads and electronically signs necessary consent(s)
- 4. Collector chooses to collect BAC or urine
- 5. Collector completes collection entering pertinent details into the app
- 6. App pushes information, including any photographic scans, to SSIS

The IPAA FFD Mobile App streamlines and simplifies in-processing tasks.
